CALIBRATION AND MEASUREMENT CAPABILITIES (CMC) ^{Notes 1,2}

Measured Parameter or Device Calibrated	Range	Expanded Uncertainty ^{Notes 3,5}	Remarks
DIMENSIONAL			
LENGTH & DIAMETER; STEP GAGES (20/D05)			
Gage Blocks - Croblox or steel	0.050 in to 1.0 in	4 μin	Comparison to master gage Blocks using comparator stand and gage amplifier
	2.0 in to 4.0 in	2 μin + 1.5 μin/in	
Long blocks - steel	5.0 in to 10.0 in	2.5 μin + 1.5 μin/in	Comparison to master gage Blocks using universal measuring machine
	>10.0 in to 20.0 in	2.8 μin + 1.6 μin/in	
Micrometers, Outside, Inside, Depth Field calibrations available ^{Note 4} Mobile laboratory available ^{Note 7}	Up to 2 in	40 μin + 0.6R	Comparison to gage blocks
	>2 in to 36 in	40 μin + 3 μin/in + 0.6R	
Calipers Field calibrations available ^{Note 4} Mobile laboratory available ^{Note 7}	0 in to 6 in	81 μin + 0.6R	Comparison to gage blocks
	>6 in to 60 in	81 μin + 7.9 μin/in + 0.6R	
Indicators Field calibrations available ^{Note 4} Mobile laboratory available ^{Note 7}	0 in to 4 in	7.6 μin + 0.6R	Comparison to gage blocks

2023-12-13 through 2024-12-31
Effective dates

NVLAP LAB CODE 200958-0

CALIBRATION AND MEASUREMENT CAPABILITIES (CMC) ^{Notes 1,2}

Measured Parameter or Device Calibrated	Range	Expanded Uncertainty ^{Notes 3,5}	Remarks
Height Gages Field calibrations available ^{Note 4} Mobile laboratory available ^{Note 7}	0 in to 40 in	160 μin + 1.7 μin/in + 0.6R	Comparison to gage blocks
Single Axis, Inner Dimension Field calibrations available ^{Note 4} Mobile laboratory available ^{Note 7}	0.10 in to 10 in	6.2 μin + 1.8 μin/in	Ring comparator and gage blocks
Single Axis, Outer Dimension Field calibrations available ^{Note 4} Mobile laboratory available ^{Note 7}	Up to 10 in	13 μin + 1.5 μin/in	Super Micrometer and gage blocks
Primary Lab only	< 1 in	5.1 μin	Universal measuring machine and gage blocks
MEASURING WIRES (20/D07)			
Thread Wire Sets Field calibrations available ^{Note 4} Mobile laboratory available ^{Note 7}	4 TPI to 80 TPI	19 μin	Gage blocks and Super Micrometer
SURFACE TEXTURE (20/D12)			
Surface Plates Field calibrations available ^{Note 4}			
Flatness, overall	Up to 225 in on diag.	45 μin	Electronic levels
Flatness, local area	Up to 12 in on diag.	32 μin	Datum gage (Repeat-o-meter)
THREADED PLUG & RING GAGES (20/D14)			
Thread Ring Gages - pitch diameter Field calibrations available ^{Note 4} Mobile laboratory available ^{Note 7}	> 0 in to 9 in	4.7 x 10 ⁻⁴ in	Setting plug gages
Thread Plug Gages - pitch diameter Field calibrations available ^{Note 4} Mobile laboratory available ^{Note 7}	> 0 in to 9 in	33 μin	Super Micrometer and thread wires

Notes

Note 1: A Calibration and Measurement Capability (CMC) is a description of the best result of a calibration or measurement (result with the smallest uncertainty of measurement) that is available to the laboratory's customers under normal conditions, when performing more or less routine calibrations of nearly ideal measurement standards or instruments. The CMC is described in the laboratory's scope of accreditation by: the measurement parameter/device being calibrated, the measurement range, the uncertainty associated with that range (see note 3), and remarks on additional parameters, if applicable.

Note 2: Calibration and Measurement Capabilities are traceable to the national measurement standards of the U.S. or to the national measurement standards of other countries and are thus traceable to the internationally accepted representation of the appropriate SI (Système International) unit.

Note 3: The uncertainty associated with a measurement in a CMC is an expanded uncertainty with a level of confidence of approximately 95 %, typically using a coverage factor of $k = 2$. However, laboratories may report a coverage factor different than $k = 2$ to achieve the 95 % level of confidence. Units for the measurand and its uncertainty are to match. Exceptions to this occur when marketplace practice employs mixed units, such as when the artifact to be measured is labeled in non-SI units and the uncertainty is given in SI units (Example: 5 lb weight with uncertainty given in mg).

Note 3a: The uncertainty of a specific calibration by the laboratory may be greater than the uncertainty in the CMC due to the condition and behavior of the customer's device and specific circumstances of the calibration. The uncertainties quoted do not include possible effects on the calibrated device of transportation, long term stability, or intended use.

Note 3b: As the CMC represents the best measurement results achievable under normal conditions, the accredited calibration laboratory shall not report smaller uncertainty of measurement than that given in a CMC for calibrations or measurements covered by that CMC.

Note 3c: As described in Note 1, CMCs cover calibrations and measurements that are available to the laboratory's customers under *normal conditions*. However, the laboratory may have the capability to offer special tests, employing special conditions, which yield calibration or measurement results with lower uncertainties. Such special tests are not covered by the CMCs and are outside the laboratory's scope of accreditation. In this case, NVLAP requirements for the labeling, on calibration reports, of results outside the laboratory's scope of accreditation apply. These requirements are set out in Annex A.5 of NIST Handbook 150, Procedures and General Requirements.

Note 4: Uncertainties associated with field service calibration may be greater as they incorporate on-site environmental contributions, transportation effects, or other factors that affect the measurements. (This note applies only if marked in the body of the scope.)

Note 5: Values listed with percent (%) are percent of reading or generated value unless otherwise noted.

Note 6: NVLAP accreditation is the formal recognition of specific calibration capabilities. Neither NVLAP nor NIST guarantee the accuracy of individual calibrations made by accredited laboratories.

Note 7: The laboratory utilizes a mobile lab for most of its field service work. Please note that uncertainties listed are valid whenever the work is performed in the mobile lab. If work is done in customer facility, then note 4 will apply.
